

# Chief Digital Officer as a Service (CDO): Digital expertise made to measure

When it comes to digital transformation, the CDO plays a key role. As an innovative leader, he or she develops companies in a targeted manner and creates sustainable competitive advantages for the digital world of tomorrow.

With a made-to-measure CDO as a service, organizations of any size and in any industry can leverage inspiring digital expertise for a flexible period of time - to effectively master strategic challenges.

## Why should I use a CDOaaS?

- To preserve time, security & profit for your own core business.
- To effectively shape change & innovation.
- To strengthen your own position in the new digital economy.
- To find well-founded solutions for success-critical key questions in challenging situations.

## How does the cooperation with UMB work?

- Area of operation, workload & duration as required.
- Transparency in target fulfillment, quality & service delivery.
- Simple, understandable, and highly accessible communication.
- Solution-oriented partnership with inspiring on-site as well as remote engagement.

## What does the service include?

- Concrete results in a timely manner.
- Unique expertise and experience in the form of a trusted resource with a high level of suitability.
- Comparisons with successful reference projects & companies from a neutral point of view.
- Empowerment of internal resources and strengthening of your own IT maturity.

The right combination of business, social and technical expertise creates a tangible edge and manages to sustain customer loyalty through unique solutions. Success is teamwork. Get in touch with us today and let us help you profitably shape your digital future.
