

Security Advisory Services

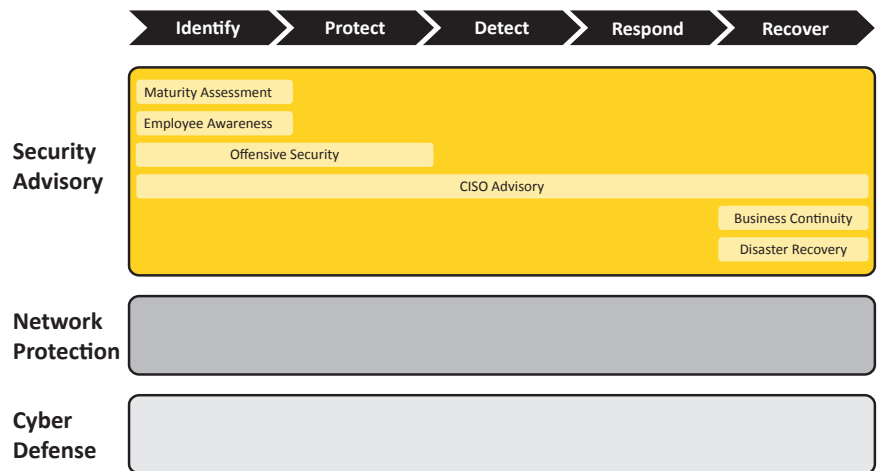

Your entire security measures from a single source: UMB’s portfolio includes the components Security Advisory Services, Network Protection and Cyber Defense, providing an extremely strong defense against cyber attacks of any kind. All services can either be purchased individually or can be integrated into UMB’s overall solutions. The following will show you how our Security Advisory Services can contribute to your overall security.

It’s like driving a car: Only when all safety measures, such as appropriate speed, effective brakes, fastened seat belts, a solid vehicle structure, and electronic aids work together, can you feel really safe. It is precisely such holistic protection we offer. Our service is based on the proven NIST cyber security framework. We identify dangers, protect you from them, detect threats, respond to them and ensure that you can get back to normal operation as quickly as possible.

These are your benefits from UMB Security Advisory Services

- Security consulting and implementation from a single source
- Our own Cyber Defense Center, 7/24
- All-round protection with the UMB 360-degree approach according to NIST
- A reduction of interfaces (one-stop-shop)
- A large selection of leading edge security products with first class partnerships

Cyber Security Services by UMB.

Our Security Advisory Services

Security maturity assessment

Know your cyber security maturity and create certainty. We follow the NIST framework and propose concrete measures - sorted by priority.

Employee awareness and phishing campaigns

Your employees are still one of your biggest security risks - especially in their home offices. Protect your employees against cyber threats in general and phishing emails in particular.

Offensive security – penetration test

How strong is your cyber defense? Our specialists can test this in detail - according to a script agreed with you.

Offensive security – digital risk monitoring

You will learn about your company's footprint in the digital world and what the cyber world knows about you. You will be amazed.

Offensive security – Red- and/or blue teaming

The red team represents the attack team. The blue team is the defense team. With these two teams, your cyber security disposition can be thoroughly checked and improved.

Offensive security – supply chain security

In a connected and digital world, your supply chain can pose a risk to your business. You will learn about the digital footprint of your supply chain.

CISO advisory

Nowadays, security officers have to meet very high demands. We can support your CISO with our security know-how. If required, we can also assume the role of your CISO on the basis of a mandate.

Business continuity management

Get to know your corporate risks and learn how to assess them correctly. Our specialists work with concrete scenarios and take organizational, regulatory, and technical aspects into account.

Disaster recovery - emergency manual

Every unproductive minute can cost your company a lot of money. In order not to lose time in an emergency and to quickly return to normal operation, a customer-specific and resilient emergency manual is indispensable. We will create the manual together with you.

UMB all-round security - we see your IT as a whole

All-round security is only achieved when all components are included in your security concept. We offer a network of specialists with our leading edge competence in the areas of consulting, cloud, digital transformation, modern work and infrastructure. UMB has access to over 500 proven experts. This means that we master all disciplines and areas of your IT - there will be no gateways for hackers! Our Security Advisory services are available as a single service or as an integral part of our IT services.

Want to feel secure all around? Contact us!

We will be happy to answer your questions on Security Advisory and other topics.
