

Apple Readiness Assessment – Assess Your IT Infrastructure for Using Apple Devices

Apple devices are used for work as well as for personal use. This means that no company can afford not to integrate Apple products. A suitable IT infrastructure is essential if these devices are to be used optimally. Our service includes a comprehensive analysis of your IT environment to ensure that it meets the specific requirements for the operation of Apple devices.

Integrating Apple devices into existing IT infrastructures is a great way for organizations to take advantage of modern technology. To ensure seamless integration, it is important to consider specific network, security, management and hardware compatibility requirements. Careful analysis and thoughtful customization can not only make the use of Apple devices seamless, but also increase the efficiency and security of your organization.

Integration of Apple devices

The challenge lies in the seamless integration of Apple devices into existing IT infrastructures. Specific requirements such as network compatibility, security guidelines, efficient device management and compatibility with

existing hardware must be taken into account. Without a structured analysis and adaptation, this can lead to problems such as limited functionality, security gaps or increased administrative effort.

Optimum preparation with the Apple Readiness Assessment

Our solution is the Apple Readiness Assessment - a comprehensive, structured offering that ensures your IT infrastructure is ready for the specific requirements of Apple devices. Our assessment helps you identify and address potential challenges early on. We analyze your existing infrastructure and develop customized solutions to optimize the integration and operation of Apple devices in your organization.

Scope of services ¹	Standard
Analyzing Internet access	👍
Checking Apple services	👍
Analyzing WLAN compatibility ²	👍
Checking the antivirus solution	👍
Analyzing security solutions	👍
Check Intune-Tenant	👍
Analyzing application availability ³	👍
Apple business managers review	👍
Checking VPN compatibility	👍
Analyzing peripherals	👍
Checking Apple hardware functions	👍
Analyzing printer solutions ⁴	👍
Generate report	👍
Prepare an offer	👍
Costs	
Analysis (one-time)	CHF 2000.00

1. A maximum of 3 standardized workstation configurations will be tested (docking, screen, camera and keyboard).
2. The customer must provide all networks to be tested (WLAN, LAN, VLANs, etc.)
3. A maximum of the 20 most important applications will be tested. Customer will provide the applications.
4. A maximum of 5 printer types or a FollowMe solution with 3 different printers will be tested.

Your advantages

Thorough analysis

We will check your existing IT infrastructure in the areas of network, security, management and hardware for its suitability for Apple devices.

Identification of challenges

Potential problems and weak points are identified at an early stage so that targeted countermeasures can be introduced.

Individual action plan

We will draw up a detailed plan for you with recommendations for action to optimize your infrastructure.

Concrete solutions that can be implemented

Based on our analysis, you will receive a transparent offer with all the necessary steps and solutions.

«If you don't go with time,
time will go without you.»

Modern Work Genius

Efficiency and innovation keep you
one step ahead.
