

IT Strategy with UMB: The Right Move will Determine Your Business Success.

In the digital age, IT strategy is an integral part of a company’s business strategy. Your IT strategy must be precisely aligned with your business objectives. This requires a great deal of expertise and a holistic view that goes far beyond the topic of IT. Leave nothing to chance when making these strategy decisions and consult our experts. Our business advisors know the IT strategy process inside out and will support you with their expertise. Secure your future business success with the right move now.

The right move is crucial for your future business success.

Our experts will contribute comprehensive know-how to help you develop and implement an effective IT strategy. As your partner, we will assist you in optimally aligning your IT systems with your business goals and business processes and preparing your organization for future challenges.

Central elements of an IT strategy

Taking into account a closely coordinated business-IT alignment, the following topics will be developed and defined:

- Basic principles
- Policies (internal, external)
- Information security
- Service portfolio
- IT architecture
- IT organization
- IT governance

Depending on the situation, further dedicated strategies aligned with the IT strategy in the areas of cloud, workplace, operating model, applications, infrastructure, and information security can be useful.

How we work

Our approach is based on the following principles:

- Strategic: The IT strategy is created through a combination of top-down and bottom-up approaches.
- Pragmatic: We get started quickly developing it.
- Sustainable: We consider both current and future IT requirements.
- Holistic: We will consider all aspects relevant to your business, the technical aspects (infrastructure, applications, security), as well as the organizational, process-related, and cultural aspects.
- Focused & individually: We will address your specific requirements and focus on industry and company size.

Your advantages

- Requirement-based access to specialist knowledge and experience, on an as-you-go basis
- More time and focus for your core processes and your main business
- Specific support - adapted to your business strategy and business processes
- Fast results through a pragmatic, holistic approach
- Increased efficiency and productivity by optimizing processes and systems
- Risk mitigation in terms of security, data protection and compliance
- Improved collaboration between different departments and teams as well as optimized communication within the organization
