

Optimal support of your business.

Digital transformation offers ever more business possibilities. Take advantage of this development and adjust your IT to seamlessly converge with your business objectives. IT consulting with UMB leads to an innovative and flexible IT platform for your sustainable corporate success.

Our team will be on your side from the start, through all stages, until the successful finish of your transformation, guaranteeing long term success. Our Opportunity and Discovery Workshop will demonstrate your potential to shape your business and make it even more successful – with concrete recommendations for action.

Understanding your business - our experts come with industry experience

UMB's selected specialists with broad industry experience know your challenges. Digital transformation is not only about technology but above all about understanding your business procedures and objectives – and about supporting these processes optimally with IT.

End to end: We will provide support for your business

It's great to understand the theory. It's even better if the theory can be put into practice. We will facilitate your transformation within the framework of strategic consulting, from start to implementation – as a sourcing or engineering solution. For you, UMB means you get it all from a single source.

As a project or a contract

Despite or precisely because of today's short technology cycles, companies require long term planning. We will demonstrate how to adjust your IT to serve your business objectives and show you the required instruments. We offer our IT consulting services both as a project and on a contracting basis.

As much CIO as needed: CIO as a service

To have a CIO exactly when you need him or her – that's what CIO as a service means. Whether it is an interim CIO in case of a personnel shortage or additional support for the existing IT management: CIO as a service is the answer to the permanent need for change in IT.
